INTRODUCTION

This document demonstrates the use of our custom, modular \LaTeX template. We can use all our predefined commands and environments. For example, we can easily write mathematical notation for the set of real numbers, \mathbb{R} , or the expectation, \mathbb{E} .

Here is a citation to a famous work by Einstein [?].

Note: A Note on Modularity

This colored box is an example of a custom environment defined in our style package. It helps keep the main document clean and focused on content.

1.1 Demonstrating Custom Commands

We can use our custom TikZ commands, like this colored

1.1.1 A list example

Our list styles are also customized:

1. First item.
2. Second item, showing the custom boxed numbering.
